

## BRAKE LINE COPPER/NICKEL

Due to the flexible material the mounting of the copper-nickel brake lines is significantly easier than that of the conventional steel line.

The brake line can also be bended by hand without tools in small diameters. The pressure resistance thereby corresponds to the steel line.

Through the high corrosion resistance it achieves a nearly unlimited lifetime.

Article no. / Dimensions

1915 = Ø: 4,76 mm, Length 5 m  
1916 = Ø: 4,76 mm, Length 25 m  
1935 = Ø: 5/16 Inch, Length 5 m  
1965 = Ø: 6,00 mm, Length 5 m

available in 5 meters  
and 25 meters length

copper/  
nickel
